MTH2010 Groups, Rings, and Fields: Summative Assessment 1

This Summative Assessment covers the material presented in Graded Formative Assessment 1 and Problem Sheet 1, possibly with minor notational changes, and counts 15% towards your final grade.

Each question will be graded on a 10-point scale, and your mark on ELE will be scaled by a factor of 5 so as to be a mark out of 100.

Assessment criteria for Summative Assessment 1

The assessment criteria for Summative Assessment 1 are as follows:

To achieve a pass mark, you will need to demonstrate that you know the basic definitions of the subject and can verify whether or not they hold in some familiar cases. To achieve full marks, you will have to demonstrate a thorough understanding of the concepts by relating them to more elaborate mathematical contexts. You will also need to demonstrate the ability to construct mathematical arguments and to communicate them effectively through clearly explained and logically correct proofs with accurate use of appropriate mathematical notation and terminology.

Statement on use of GenAI tools for Summative Assessment 1

This assessment is an in-class, in-person, closed book invigilated coursework assessment, and thus classified as AI-Prohibited. This means that during this assessment you must not use Generative AI (GenAI) tools. Using GenAI tools prevents fair assessment of your ability to achieve the module learning outcomes. See Chapter 2 of the Academic Conduct and Practice Handbook.

Before starting this assessment, please fill in the information requested below.
Failure to complete the below, or providing incorrect information, may result in a lower or zero grade.

Student ID Number: _____

Candidate Number: _____

Date: _____

Tutorial Group: Please circle your tutor's name and tutorial time

Prof. Julio Andrade		09:35–10:25	10:35–11:25	
Prof. Gihan Marasingha	08:35–09:25	09:35–10:25		
Prof. Mohamed Saïdi			10:35–11:25	11:35–12:25

Please note:

- Both sides of the last sheet of paper are included for rough working if needed, and any material on either side of the last sheet will not be graded.
- The assignment consists of 2 Questions, and to gain full marks both questions need to be answered.
